MOSQUITO CONTROL PROGRAM

Municipal Responsibility

- To abate existing mosquito breeding sources
- To prevent new breeding sites so you can use and enjoy your yard and other municipal recreational facilities
- To protect public health and comfort

Breeding sources we control are created by standing water, which may be found in street catch-basins, subdivision drains, roadside ditches, flood channels, ravines and other public rights-of-way. Routine larviciding, done as necessary throughout the season will keep these areas mosquito free. It is our responsibility to work with whatever local, state, or federal agencies may be involved to keep these areas abated.

The Department of Public Works will begin spraying for mosquitoes in May. The spraying will be done between the hours of 1:00 a.m. – 5:00 a.m., once or twice a week during warm weather to maintain mosquito control. Mosquitoes are not only annoying, but also they can be transmitter of encephalitis, malaria, yellow fever and West Nile Virus in humans and heartworm to pets.

Property Owner Responsibility:

- Get ride of old tires, buckets, etc. or any water holding containers
- Fill in or drain any low places (puddles, ruts) in yard
- Keep drains, ditches and culverts clean of weeds and trash so water can drain properly
- Cover trash containers to keep out rain water
- Repair leaky pipes and outside faucets
- Empty plastic wading pools at least once a week and store indoors when not in use
- Make sure your backyard pool is properly cared for while on vacation
- Fill in tree rot holes and hollow stumps that hold water with sand or concrete
- Change the water in bird baths and plant pots or drip trays at least once each week
- Keep grass cut short and shrubbery well trimmed around the house so adult mosquitoes will not hide there.

Brush Pick-up Program

Brush pickup will be the second Monday of the month beginning April 12, 2010. Please use the following criteria when placing brush at the curb for pickup:

- Call City hall at 651-6101 and have your name placed on the brush pickup list.
- Place all limbs one-way (i.e., all cut ends facing the same direction)
- No tree limbs larger than 6 inches in diameter
- Limbs not to exceed 3 feet in length
- No stumps, firewood, dirt, trash, vines or any foreign objects.
- Thorn bearing items must be put in a separate pile
- Brush must be placed at the curbside or roadside, but not in the street
